Crimsafe doors are attractive and strong...

Crimsafe's doors for your home are available in standard frames, colonial designs or cast panels, and can even be recessed into solid wood frames for a natural timber look. Our doors can be hinged or sliding.

All of our doors feature the unique Crimsafe screw-clamp system... tamper-resistant screws go through a metal clamp, then through the Tensile Tuff mesh and then they're driven right into the frame, to hold the mesh in a "vice-like" grip which gives the door enormous strength against attack.

Applications -

Increase security and enhance your lifestyle.

- Anywhere that an attractive yet strong and secure door is required.

Only Crimsafe drives a screw right through mesh and frame - for unbeatable strength

Features & Benefits of Crimsafe Doors -

3-Point Locking

All our hinged doors come with 3-point locking as standard. Our sliding doors can utilise a single lock or be triple-locked. Triple the locks means added security.

3-Point Hinging

3 hinges give the door greater strength and make it much harder to gain entry through the door.

Can be constructed out-of-square

If your door space isn't exactly square, don't worry. Our doors can be cut to suit any opening without a loss in strength.

Attractive Mid-rail as standard option

Besides being an attractive feature of the door that can be positioned to match existing features of your home, our mid-rail boosts the door's strength and anti-jemmy properties. It also acts as a visual warning so you don't walk into the door.

Tailored Designs

Using Cast Panel inserts or Colonial Designs we can match your new door precisely to your home.

Screw-Clamped Security

Only Crimsafe clamps 304 Tensile Tuff® Security Mesh between 2 serrated pieces of metal, then drives a screw right through both mesh and frame to ensure a vice-like grip...and beat burglars.

Tamper-Resistant screws

Exclusive to Crimsafe. Screws can only be applied or removed by a tool registered with Crimsafe. This ensures the integrity of your security system.

Custom Built

Means a perfectly fitted job. Product can be made to fit the exact shape of your door.

Enhanced Lifestyle

Crimsafe provides unhindered views, keeps out mosquitoes, and lets you keep a cool, safe house in Summer.

Blocks Out at least 30% of UV Rays

Means a longer life for interior furnishings.

Blocks Heat Transfer

Improves the Energy Rating of glass doors and keeps home cooler in Summer and warmer in Winter.

Passes Australian Standards

Crimsafe always exceeds the relevant Australian and Industry Standards for security.

Full Range of Colours

Crimsafe stocks a full range of standard colours so that the system you buy complements your home. Other colours are available on request.

Guaranteed for 10 years

Crimsafe warrants the product from defects in materials under the conditions of normal use for up to 10 years from the date of purchase. Please refer to our Care Guide for more information.
